To whom it may concern

Fab-Lite Building Solutions Limited are a named production facility under Stage 2 scoping contract S165339 with the British Board of Agrément. The scoping considers their lightweight brick slip arch product for use as a decorative brick slip clad arch over openings in low rise buildings, when supported by a load bearing steel lintel below.

This contract allows for an in-depth scoping exercise to be undertaken, to allow the final (Stage 3) Agrément Certification contract to be issued, under which Fab-lite Building Solutions will be a named production facility, subject to surveillance work upon successful completion of a certificate.

The British Board of Agrément is liaising with the party named above to provide final Agrément Certification contracts to be issued and accepted before the agreed NHBC deadline of 31st December 2020. A further letter of intent will be issued once the Stage 3 certification contract is underway.

Yours sincerely
